

Quotes from Governor Ronnie Musgrove regarding Governor's Health Care Summit Series:

I am excited about this opportunity to bring together every type of health care professional and provider to begin a dialogue on a wide range of health care issues.

The three summits will bring together the knowledge and resources of many health care experts in a coordinated effort that will result in better health care options and opportunities for the people of our state.

We are glad to offer this opportunity to both people in the health care industry and to every Mississippian who uses health care services in our state.
